EXPERIENCE

Collaboration & Web Content Specialist

October 2023 - Present

University of Minnesota

- Assist in testing of Document Management, Drupal Content Management System and help with other web related tasks, including work on the Folwell Web Theme.
- Creating and executing test cases, identifying, and reporting bugs, and collaborating with developers to fix bugs.
- Help manage a multi-site Drupal platform and troubleshoot issues with the Drupal CMS.
- Create, edit, and maintain technical documentation for Collaboration & Web Content services.

Web Intern

September 2023 - November 2023

Drupal Association

- Created a custom content type to manage event-related content. Customized the fields within this content type to accommodate event-specific content for the company's website.
- Configured a view and set up filters, sorting options, and contextual filters in the view to manage how events are displayed.
- Created a dedicated page to showcase Social Events for a particular parent conference. Linked the view I configured to the page to display relevant events.
- Added date links on the page for users to filter events by specific dates. These links allow users to easily view events scheduled for particular days.
- Implemented methods to ensure that certain blocks and elements only appear on related pages, improving the overall user experience.

Discover Drupal Student

August 2022 - June 2023

Drupal Association

- Gained an understanding of the architecture and structure of the Drupal CMS, including its modular design, core components, and how modules interact with each other.
- Learned how to create custom modules in Drupal to extend its functionality and meet specific requirements. This involved defining module information, implementing hooks, creating forms, and handling form submissions.
- Explored Drupal's content modeling capabilities by creating custom content types and configuring fields to define the structure and data associated with different types of content.
- Gained insights into Drupal's theming layer and how to customize the appearance of your Drupal site using themes, templates, and CSS.
- Learned site-building techniques to configure and customize Drupal sites without writing code. This included managing menus, blocks, views, and configuring user roles and permissions.
